

### 2.4.3 Printer Setting

This function allows users to specify the default printers for OLTJ (Online Trade Journal) and Normal trade journal respectively. OLTJ is restricted to use the Dot matrix printer only as default. The default printer of Normal Trade Journal can freely select either Dot Matrix or other types of printer. The newly added printers should perform driver search function in “Add Printer” in next chapter.

#### Interface

#### Set printer for OLTJ

Enter path for the Dot Matrix Printer location (e.g.: \\computerName\printerName) and then press “CONFIRM” button

#### Set printer for Normal Trade Journal

Select the type of printer (Dot Matrix or others), then enter path for the Printer location (e.g.: \\computerName\printerName) if Dot Matrix Printer is selected. For other type of printer, the installed printers are selectable from the printer selection combo box.
