

3.11 Index Interval Enquiry

This function allows all users to enquire indices by inserting defined name of selected index. The function displays accumulated changes, 15 minutes index interval and real time index changes of index for selected index. For each of the mentioned type, it includes index open value, high and low value within the section, index of last min with comparison to previous close, change, change % and turnover.

The comparison of previous close index is shown in red when it is lower than previous close, and it uses green when it is higher than previous close. In the column of HIGH and LOW, the highest and lowest of intra-day value is highlighted for reference. User can use NEXT and PREVIOUS to scroll to view the intervals. The Main board turnover (AOI) and GEM board turnover (GEI) will only show the value of turnover, the rest of the columns are blank.

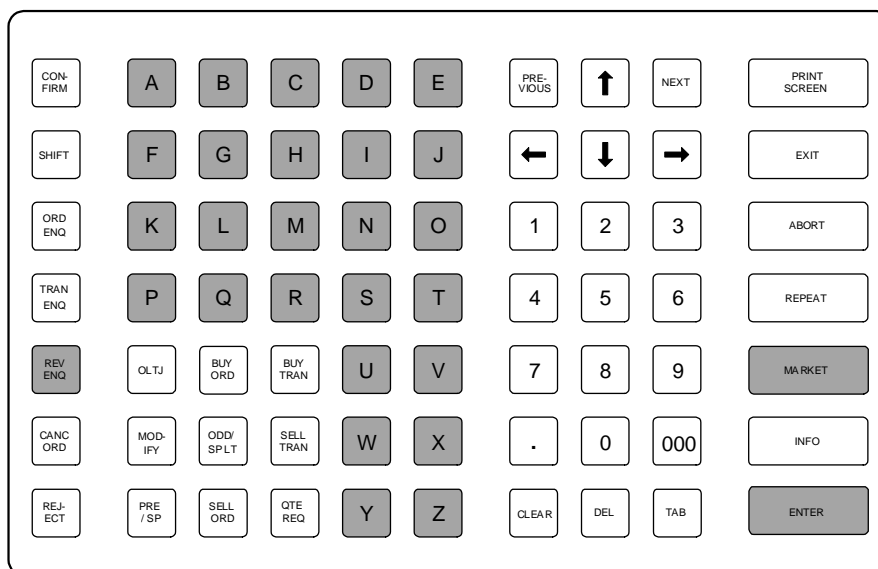

For Exchange's customized-keyboard:

- Step1: Press MARKET
- Step2: Press REV ENQ
- Step3: Input data
- Step4: Press ENTER

For 101-keyboard:

- Step1: Press F4
- Step2: Press F10
- Step3: Input data
- Step4: Press ENTER
