

3.3 Security Enquiry

This real-time, single screen enquiry provides all users primarily with market information required for trading in all securities, including securities, equities, trusts, warrants and bonds. User enters security code in the top panel. The information displayed includes general information, 10 levels of market depth, latest 5 ticker trades information and the queued broker ID within maximum 20 spreads. To enquire on another security, just do step 2 to step 3 again; i.e., there is no need to press the MARKET keys for successive security enquiries. The NEXT (PAGE UP) and PREVIOUS (PAGE DOWN) keys can also be used to display the next and previous valid security.

For Exchange's customized-keyboard:

Step1:Press MARKETStep2:Input Security CodeStep3:Press ENTER

Exchange's customized-keyboard
