

3.6 News Window

This function allows all users to check for News released by HKEX. It is invoked by INFO button of customized keyboard, or ALT+F1 for keyboard. The News Details are presented when user selects News Headline. User will return to Security Enquiry page when they exit from the news page. User can use mouse click, or arrow keys to highlight the news, and then press TAB to view the news content. The latest news is shown on the top of the page.

To toggle between news and details, user can press TAB. To scroll on details, user can press PAGE UP/PAGE DOWN, OR PREVIOUS/ NEXT on customized keyboard.

For Exchange's customized-keyboard:

Step1: Press INFO Step2: User Arrow keys to select News Step3: Press TAB Step4: Press PREVIOUS/NEXT to scroll on details

For 101-keyboard:

Step1: Press ALT+F1 Step2: User Arrow keys to select News Step3: Press TAB Step4: Press Page Up/Page Down to scroll on details
