

4 Trader Function Support By ETSS's MWS Parody

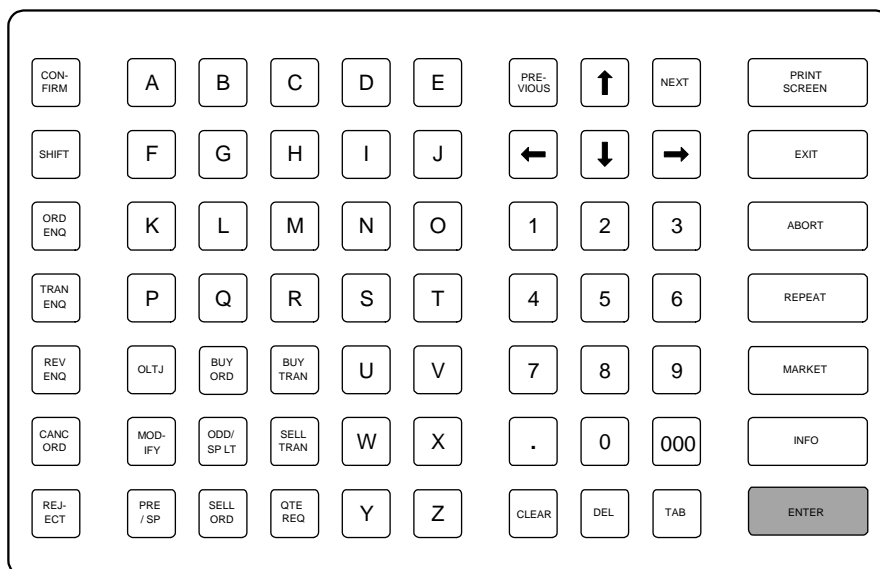

4.1 Clear Screen

The function allows users to clear all data from both the Input and Display Windows on the screen. No input is required. The screen is cleared after pressing enter, after each complete function. The upper panel for filters will be reset to default layout, and the lower panel will be cleared.

For Exchange's customized-keyboard:

Step1: Press ENTER

Exchange's customized-keyboard

For 101-keyboard:

Step1: Press ENTER
