

4.14 Modify Order

This function allows users to modify a single board lot (not applicable for odd lot/special lot) order. The user first performs any of the "Outstanding Order Enquiry" / "All order enquiry" and then uses the Up/Down arrow key to select the order to be modified. The user can modify Price, Quantity, Reference or Trade Classification either individually or as a combination. The result of the modification is displayed in status window.

When the order reduced to zero quantity, the queued order will be cancelled by hosts directly. Once this modified order is submitted, it will be accepted by hosts.
