

### 4.20 Input Overseas Sale

This function allows a selling user to input details of off-market overseas sales one at a time. User must enter the security code, price, quantity, overseas indicator and trade classification. Optionally, he can specify reference and client account. If all is correct, a sale accepted message is returned. The sale does not have board lot checking, and it does not have maximum lot size limitation.

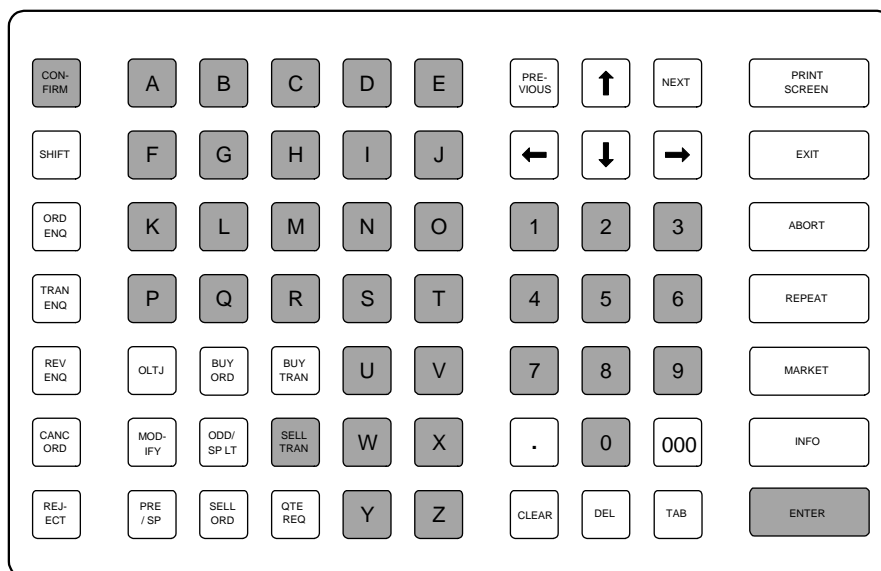

#### For Exchange's customized-keyboard:
