4.24 Input Overseas Purchase

This function allows a buying trader to input overseas purchases. Trader can specify trade classification and may also optionally enter a reference and client account. If all is correct, a purchase accepted message is displayed. The correspondent broker number is not required. The direct indicator can only be 'N'. The settlement type is set to blank and the overseas indicator is set to 'Y'. The purchase does not have board lot checking, and it does not have maximum lot size limitation.
