

4.31.5 Price Warning Mechanism (For Trade Input With Price Warning)

Price warning mechanism for trade input with price warning is triggered when the trade price is far from the nominal price of market. For trade of price warning, users enters security code, price and number of spreads away from nominal price. If all is correct, a sale submitted message is displayed.

The background colour of input window for trade input turns red. The re-entered price and quantity must be the same as original. After the trade is submitted, the background returns to its usual colour. If trader presses ABORT key during trade input or closes the trade input window, the trade will be cancelled.
