5.6   Bulk Cancel (Broker Level)

This function allows supervisors to cancel multiple board lot orders and requests of a Broker Number in all or any one of the auto-matching securities. The supervisor enters broker number and other optional fields like security code, market code, ALL STOCKS or REQ. If all is correct, a bulk cancel request accepted message is displayed. The order will cancel all orders under the specified Broker ID in the market.

ETTSS had merged the similar functions (broker bulk cancel, [Buy, Ask, Both]) together, so a new filter "B/A" has added for supervisors to identify bid or ask orders. The field TRADER ID in MWS is renamed as USER ID in ETTSS, as user hierarchy has changed.

Broker bulk cancel (Broker level) cannot be opened by keyboard; user has to click the menu by mouse.
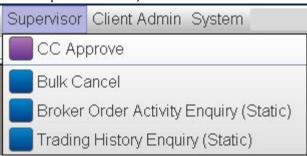

Fields for user reference

Field Name	Type	IN/OUT	Optional / Mandatory	Remarks
STOCK	Number (5)	IN	Optional	Security Code
