

## 5.8 Broker Order Activity Enquiry (Static)

This non-real-time enquiry allows users using supervisor role to enquire on all order-related operations, including response from market and hosts. The supervisor enters security code, price, quantity, user ID, broker ID, time or market code to restrict the information displayed. If all is correct, all order-related operations and paired market actions performed by using the specified user ID or broker ID so far today are displayed. "\*" (Asterisk) is added to time column to show the server response time.

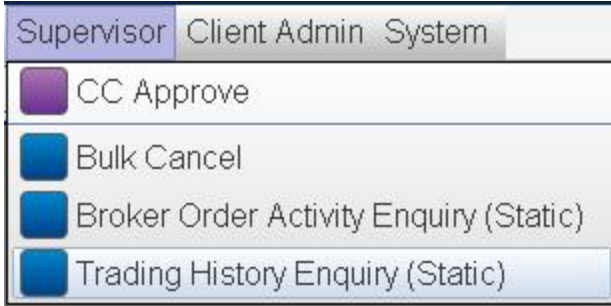

The Broker Order Activity Enquiry (Static) on supervisor role cannot be opened by HKEX's customized keyboard. User has to open the function by using Mouse.

### Fields for user reference

| Field Name | Type               | IN/OUT | Optional / Mandatory | Remarks   |
|------------|--------------------|--------|----------------------|---|
| STOCK      | Character(5)       | IN     | Optional             | Security Code FILTER<br>Show all orders if it is blank  |
